## Long Term Trend Charts-Major Markets-S&P, Gold, DX and Oil and US T Bonds.

### S&P

On 6 Day Regression Channel, trend is: UP  
 On 12 Day Regression Channel, Trend is: UP.  
 On 24 Day Regression Channel, Trend is: UP

You've got to love this analysis which has kept my investors long since the March 2009 low, with just one Sell signal on this 6 day chart created and confirmed, whilst the 12 day chart has been as steady as a rock on its Buy signal. We didn't even get a vibration at the last DC time cycle and we are now in the next cycle which ends 04/22. remember that only price action can confirm or deny the time cycles.

On 24 Day Regression Channel, Trend is: UP

Gold is at overhead resistance from the regression channel median this week, but happy tracking up its channel.

See how Gold continues working the regression channels on the “close only” chart below, and is fighting to hold the lower channel. Do you still think markets are random?

On 12 Day Regression Channel, Trend is: UP  
On 24 Day Regression Channel, Trend is: DOWN.

DX has made a conditional Sell signal on the 6 day chart. A close on 04/26 below 80.02 will confirm the Sell signal.
