

Your Invitation to Paradise

If you seriously aspire to being a trader then better that you become a seriously good trader. And that means using Danielcode Time cycles to create stand-alone buy and sell signals.

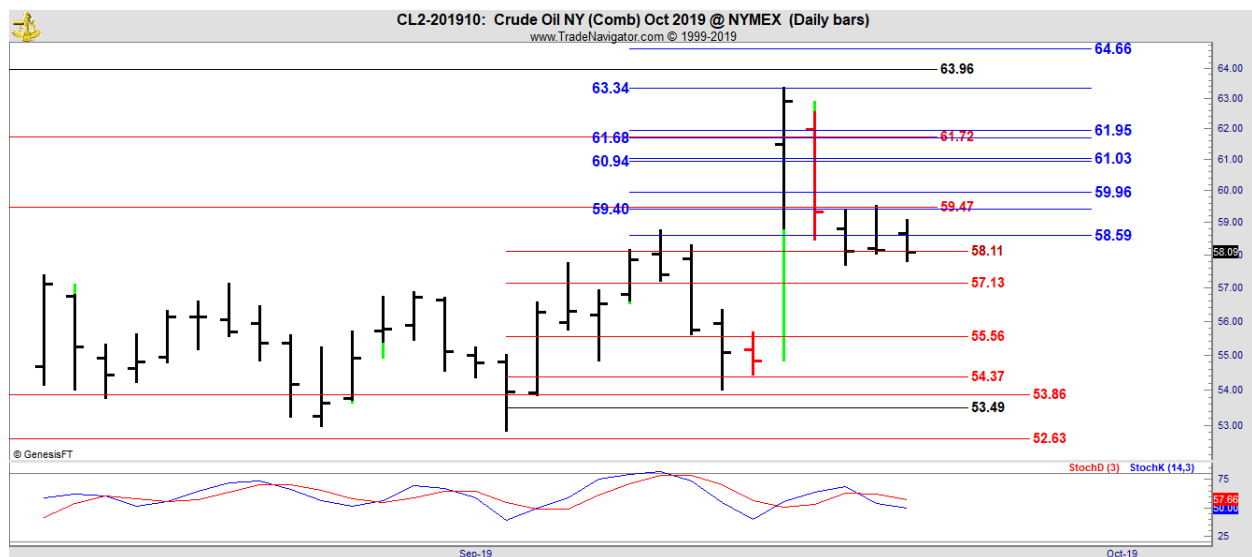

Equity markets around the world are near historic highs. Major reserve banks including US Federal Reserve, the European Central Bank long cosseted by Draghi but now under the

auspices of the failed French politician Madame Lagarde (pending) and even Australia's Reserve Bank are falling over themselves to pump liquidity into the banking systems and reduce interest rates. Australia's Reserve Bank set a precedent by reducing the already low interest rates twice in short succession and is tipped to cut again shortly. The US Fed is conducting extraordinary repos as it has hosted a series of \$85B offerings which have been forced by the short term interbank rates rising from the targeted ~2% to 10% at times. With the economy allegedly being so strong it seems totally counterintuitive for these levels of support to need such massive doses of liquidity. What is happening? What indeed. What you can be sure of is that the motors purring under their respective hoods are issuing strong warning signs to the experts that all is not as it seems. And that means that buy and hold as an ongoing strategy is not going to work much longer. A correction of some sort perhaps a massive correction is looming. We can't know the hour of the Bull markets ending but the writing is on the wall for those who are prepared to see and that means it is more urgent than ever that you take steps to learn to trade Futures markets and Forex to buttress your incomes or start a whole new income stream. Learning how to trade the Danielcode is the very best thing you can do for yourself and your family. The great beauty of Futures markets and Forex or Currency Futures is that they pay exactly the same going down as going up. Although for equities the down legs are usually faster than the rallies, but either way you are never at the mercy of markets. You can instead become the master of markets!

Time flies when you are having fun so it's a surprise that we haven't had a live Danielcode Tutorial in over three years. Some of you have learnt to trade or upgraded your trading skills with our video Tutorials but nothing beats the real thing so I am delighted to invite you attend this special Danielcode Tutorial and spend three days *up close and personal* with Master Trader John Needham at Australia's playground the sunny Gold Coast where we will talk trading, bullet proof your financial future and enjoy the pleasures and delights of this world class destination.

The Danielcode is a revolution in trading as it uses a unique mathematical matrix to produce astonishingly accurate levels of support and resistance both in price and on the other chart axis, Time. It is unlike any trading or analysis program that you may have seen before and accordingly will create quite different signals at important turning points. Those who follow the Danielcode or attend our periodic webinars will be familiar with this process which happens with regularity. Almost all market indicators are inaccurate. Either they lag behind price action or they retain overbought/oversold positions for long periods of time and finding that pinpoint accuracy

demanded by leveraged Futures and spot Forex trading is negated. Not so at the Danielcode where its unique proposition is the precise market recognition of the DC time and price targets to an unparalleled degree. I maintain that markets turn at and only at Danielcode numbers and to support that proposition you may care to peruse our Chart Archives at <http://www.thedanielcode.com/display.php?nav=historicalcharts> where thousands of the Members Charts I have created for Members since 2008 are stored. Take some time to review this cache of treasure and confirm my bold statement. And no, you do not need any mathematical ability to create these unique and largely secret DC support and resistance levels as we do much of that work for you and provide pre-programmed tools at the Tutorial for you to do the rest. So we say that “All Markets Turn at, And Only at The Danielcode Numbers”. And once you have proven this proposition for yourself you have an incredibly powerful tool that is known to only a quite small group of traders. And in trading, unique knowledge unknown to the majority is always powerful indeed. And then there is the drama! Futures markets can gap on unexpected news and the weekend can be particularly vulnerable. On the weekend of 09/15/19 the major oil processing and storage facilities in Saudi Arabia were attacked by unknown terrorists and the Crude Oil chart gapped up to 894 tics on Monday AM. When high drama is present most levels of support and resistance fail. Not so at the Danielcode. Below is the Members Chart which had been on the website for weeks. Look where the dramatic high on Monday stopped; 63.38 against the DC Blue line at 63.34 just 4 tics variance. All of the DC support and resistance numbers are accurate to <0.1%. Nothing comes near it. Note we were in the October contract then.

There is a great deal of information, testimonials and client comments in the following pages. All of the client statements were either posted by members direct to our Members Forum or are in emails retained by me.

Regardless of whether you are an occasional amateur trader with a small account or a pro with a big trading firm, I guarantee that you have never seen anything like what I teach at these Tutorials. It is unique, unknown to almost all and the most powerful trading method that I have ever seen or heard about. My wish is to make you a great trader and if you can tell the difference between red

and green and count to three I can take you there and you too will be astonished. Some are speechless when the reality of Danielcode trading is revealed. All of you start from the same base as the Danielcode is unlike any trading method you have seen before. In fact, the less you think you know about trading the easier it is for me to teach you as we don't have to get rid of all those bad ideas you have learned previously. Read through the Forum comments on the DC website and you can prove this for yourself. You don't need a big trading account and you don't need industry connections. I will take you to the top based entirely on your own ability, willingness to learn and determination. If you seriously want to be great at this business this is the only path I know of and I have been in this business for almost 30 years. It's that simple. If you have already done a DC Tutorial come and do another one. The Danielcode is a new and young discipline and it is evolving constantly. Much of this material is new and our very best traders do many Tutorials to ensure they update and keep learning.

Just a short email to let you know that all is going well with my trading. I never cease to be amazed at the fact that for once in my trading life I am actually making money by following the Daniel Code methodology.

I started with a small bank of \$US15,000 – I have now doubled that plus made enough to cover the tuition and data fees.

This month has been amazing – best week was \$8215, last week \$4662.

Yes not every trade is a winner, but still mind blowing to think I can make that much in one week trading futures from a small capital outlay. I am still keeping my trading basic for now - I believe in my charts, follow the T.03 plus signals, trends and the DC Signals from members charts.

Thanks again John for your patience with me – you are the best mentor ever. Enjoy your Easter break. Sue L North Queensland

This Tutorial will run from **Wednesday 13th November 2019 through to Friday 15th November** at Surfers Paradise, Queensland, AUSTRALIA the summer heart of fabulous beaches, restaurants, world class water parks and fun parks and warm summer days on endless golden beaches. Saturday 16th November will be a coffee and cakes catch up but for those under time pressure the formal teaching will end on the Friday Behind the gold is the green of the picturesque Gold Coast hinterland reaching down the coast to Currumbin and Snapper Rocks and inland to the majestic Mount Tamborine.

There is much more to Paradise than the physical beauty of this place. The purpose of Danielcode Tutorials is to make you self sufficient and increase your financial security and peace of mind by training you to be an elite Futures trader. No matter what stage of life you are at or

what experience if any you have of Futures markets, this Danielcode training will take you from absolute beginner to an elite level. In fact two of our very best traders had never seen a financial markets chart when they came to one of my Tutorials. So if you are new to trading I will show you how; if you are already an experienced trader I will make you better.

This will be a small gathering due to size constraints but I know that small and personal is the very best training you can have. If you have already attended a previous DC Tutorial or taken the Danielcode video Tutorials please accept my invitation to attend this event. There is much that is new and exciting from the ever evolving Danielcode that will take your knowledge further and open up new trading opportunities for you and I will certainly value the opportunity of getting to know you personally.

As a first, I will show you everything from short term and day trading, through our well established and regarded T.03 and PLUS signals and on to 6S trading and long term swing trading. You will emerge on the path to being a complete professional trader, safe and very successful. I am by no means a fan of day trading but I will show you two of the very best intraday trading programs which you can use either as stand-alone systems or to finesse your entries and stops if using our dominant daily signals.

Where: “Carmel By The Sea”, 177 Old Burleigh Rd, Broadbeach, Queensland, AUSTRALIA. The Gold Coast is a city at the South East corner of the great state of Queensland, Australia of which Surfers Paradise is the heart of the city. It is the fastest growing city in Australia and once you have seen it you will know why. It is essentially a tourist mecca and the range of things to do and places to go is immense. Take a stroll through some of the choices from the Gold Coast: <https://www.destinationgoldcoast.com/> . Here you will find much about what is on offer and see many different accommodation choices. Base your chosen accommodation of which there are endless varieties around Broadbeach <http://broadbeachgc.com/>. We will be close to restaurants, shops, the Star Casino, golf courses, yachting on the Broadwater or offshore and of course some of the best beaches in the world. November is early summer so it will be warm. Dress is casual everywhere.

Hi John, I'm really enjoying my trading. This is going to be my year where I reach the point that I could leave my day job if I wished. I probably won't because it's enjoyable, but it's a nice position to be in. And it's all thanks to you. I thoroughly appreciate the time you have put in, the patience to answer my questions and knowledge you have imparted. The DC is truly amazing.

Thanks again John, I am indebted. We must do that lunch this year!

John. John L, Coffs Harbour, NSW, Australia

To get here for our international friends most international flights terminate in Brisbane (BNE) the capital city of the State of Queensland and about a 60 minute road trip North of the Gold Coast. If traveling in Australia or from New Zealand you want to arrive at the Gold Coast Airport (OOL). It's at Coolangatta on the Southern end of the Gold Coast and just a 15 minute trip from

Broadbeach.

When: Wednesday, Thursday and Friday 13th, 14th and 15th of November 2019. Wednesday evening we will host a meet and greet to allow you to say hello to me and other folks attending. Teaching is 10:30AM to 5PM on Thursday and Friday and Saturday AM is our chance to wrap it up. Lunch is provided and I will host a group dinner on Friday evening.

What to Expect: This will be a small and intimate gathering for just the few who want to secure their financial future, start a new income producing business or take their trading to the highest level. This is the opportunity for you. And of course you will love the Gold Coast of Australia. I promise.

Just checking in after 3 short trading weeks and must say absolutely delighted with the results trading the rise and rise and fall of SB, ZS and ZW. You have shared with me the success system that does not fail....only I can fail the system! Shall continue trading the same markets till equity allows me to trade KC. So true when you say..."I don't know what the market will do tomorrow and I don't need to know! For the first time in my life, income is pouring in 24 hours a day. Mick D. QLD

Knowledge of why markets do what they do is the cast iron foundation of a safe and profitable trading career, and only the Danielcode will teach you that you need to know much more than just price. Time is what squares the market's equation and those that have read my articles and followed our videos will know how powerful this knowledge is. These days our in-depth three day Tutorials are a rarity so don't delay. If a career as a trader is on your wish list now or in the future, or you simply wish to start an alternate profit stream, this is your opportunity.

New 2019 Syllabus

Price: We teach two entirely separate methods of trading. The first is trading **Price**. You may know something about this but the unique Danielcode ratios that create our proprietary support and resistance levels distinguishes the DC method of trading Price against all others. You will see potential turning points that others do not see and cannot know. This is the start of the Danielcode difference.

Time: The next method is trading **Time**. Here we take the shortest DC time cycles again proprietary and known to a very few and we create market turns simply from these time series alone. It has been a revelation which we have been teaching quietly for about two years now. Take a look at some of the client testimonials to see what we have achieved. In trading, Time is more powerful than Price and Time comes in waves or cycles. That is each Time cycle repeats in accordance with the Danielcode ratios and it does this to infinity. They never stop. In the two years that I have been teaching trading from pure Time signals, nobody who has learnt to trade Time has ever gone back to trading Price. And you can see from the testimonials that returns from trading Time signals are several orders superior to other methods.

Short Term Trading: The sometime rise in volatility particularly in the Equity and Energy markets can create giant bars that are well outside prudent risk limits. Additionally there is a growing move to avoid holding some news susceptible markets over the weekend

and of course most prop traders are working on very small drawdowns. To adhere to your risk parameters it is a great help if you have mastered the art of short term trading. We don't specifically endorse short term trading as a primary trading method as all of our research shows trading from daily bars is the most profitable endeavor, but being able to finesse your entries, exits and stops on the shorter time frames will certainly enhance your equity curve. I will be teaching you some of the very best short term trading methods which are of great value.

Long Term or Swing Trading: Swing trading utilizing trend, targets and risk management is a valuable skill. Done properly there is some evidence that it will on occasions surpass daily trade signals as the most profitable. These trades typically run from seven to fourteen days but I will show you the techniques to shorten or lengthen the time series in use to trade considerably longer cycles.

From Beginner to Expert: The Danielcode Tutorial will take you from the simplest of chart functions as basic as what the charts show and which markets to select all the way to the intricacies of long term forecasting and everything in between. I have said elsewhere that two of our very best traders came to me for a DC Tutorial when they had never seen a financial markets chart. With this Tutorial I am combining the live teaching with some elements of the video Tutorials so you will have access to four separate video that will renew and reinforce the learning. There is a great deal of material involved so by having the video backups you can continually review each section of your new knowledge and skills.

At our Los Angeles Tutorial a few years ago I had a charming lady from Portland who was quite nervous about Tutorials. She told me she had spent \$40k doing courses with many of the big names and still couldn't trade profitably. She is a part time trader with a full time job. Three months after the Tutorial she told me her trading was great for the very first time and she was talking her daughter into learning trading with Danielcode. I can do this for you too.

And I promise you it is huge. Really huge!!! You have no idea how huge. Really! The DC is the biggest discovery in many generations and puts Needham on the same level as Archimedes, Newton and Columbus ... And that is a big statement. I just hope it's not an understatement." FDB-Member and Tutorial Graduate's post in Forum.

Danielcode Tutorials are the ultimate way to learn why markets do what they do and more importantly to know that in advance. All of the Danielcode is dedicated to the proposition that we need to know in advance where markets will turn. This Tutorial will teach you the Danielcode tools that identify the best trading probabilities and you will never be the same again. Expect a life changing experience as many DC members have affirmed.

A Danielcode Tutorial will in less than 3 days take you from the basics of trading Futures and Forex to the heights of sophistication and more importantly great success.

John: Thank you for your time last Monday. As discussed following a stern lecture to myself to follow the system here are my results ,

Start 6/5/2018 Account value \$4477. Markets traded ZC,ZW,ZS,NG (positions added as equity allowed)

As of 8/26/2018 Account value \$19882.50

Open Equity \$19925.00

Balance \$39807.50

8.89 X in 3months

Following the Daniel Code System the way you taught me TREND, SIGNAL , STOPS

THANK YOU

REGARDS

MIKE MM MN

Bring your family and friends. they will love the opportunity to see more of this beautiful city and its surrounds. We don't hold these events often so make sure you don't miss this one.

Market Forecasting The 4th Seal: Nothing that you have ever seen in markets will prepare you for the 4th Seal. I invented this form of forecasting over the past 20 years. It forecasts and identifies future turning points in markets and gives you both the time and the price at which these turns will occur. We can use The 4th Seal on 6, 12 and 24 day charts and often on daily

charts to know these vital inflection points days, weeks and often months in advance. As with everything in the Danielcode I created this remarkable forecasting tool in response to the absolute vacuum of existing forecasting tools. I have no hesitation in saying that The 4th Seal is the most accurate forecasting tool ever invented. And that's a

very large statement. Certainly in my 30 years in the markets I have never seen anything comparable or even close. It truly is another miracle from the Danielcode. Here's what previous DC Tutorial graduates have to say.

If you dive into the wonders of time and 4th degree you are going to discover miracles beyond your wildest aspirations. The DanielCode is truly the DNA of markets which means that every move of the market on every time frame is ruled by that DNA. If we would truly and completely know and understand that DNA we could literally predict every next move of any market. Time and The 4th seal are the beginning of knowledge of that DNA. Probably just the tip of the iceberg. We have a long road ahead. Welcome to the wonders of the DanielCode.” FDB, Belgium

Registration: To reserve your seat at this Tutorial please email me, jneedham@thedanielcode.com to secure your place and also provide details of your last Tutorial if you are a returning DC student. Some of you have already booked and will receive a

confirmatory email from me. If you do not receive this email it means I do not have you on my list already. If in doubt please email me again. Registrations close on Sunday 20th October 2019..

Fees: US \$7500.

I will be invoicing you a few weeks before the Tutorials. You can pay by wire, bank transfer, credit card or PayPal whichever is convenient. *DC members who have attended a previous Tutorial are offered a 40% discount to US \$4500.*

Let me know if you require some accommodation on paying my fees I will be happy to help.

You will need Genesis Trade Navigator charting software and data, and the Danielcode Library from Genesis, to best follow the tutorial material and run the three proprietary programs from which the DC Time and Price studies are built. Contact Terry at support@thedanielcode.com to arrange your free trial if necessary, If you choose to contact Trade Navigator direct ensure that you tell them you are a DC member to whom Genesis extend large discounts. New DC Library and new upgraded DC template together with the new TIME package and tools will be provided at the Tutorial. *All of the DC studies and programs are explained in simple language and for those of you who prefer other software packages, you will be easily able to adapt and transfer the DC tools to your preferred platform.*

If you are new to trading I will show you how. If you are already a good trader, I will make you better!

NOTE: If you would like to do a Danielcode Tutorial but really can't face the travel for whatever reason, you can take the Tutorial by video. This involves 4X2 hour live sessions with me, using GoToMeeting sometime in October or early November which will then enable you to tie in with the Gold Coast group for the follow up webinars. Email me if this is your preferred option.

An update on my Danielcode journey. A little over a year ago I completed a DC Video tutorial. An amazing experience in and of itself. Four-2 hour sessions were followed up with four-1 hour sessions where John reviewed my paper trading.

I have to say my "live" paper trading got off to a rough start. John pointed out that I was a very nervous trader...grabbing profits too quickly and switching between markets if I experienced a losing trade in one of them. I was making money but not nearly what I should have been. I was obviously anxious to start trading with real money but John's words to me were "I can't tell you what to do but you'll lose your ass the way you're trading". When the inventor of the DC gives you this message you'd be a fool to ignore it! He told me to paper trade Natural Gas and Gold (I also added Soybeans) for 1 year and that we'd review the paper trades before any real money was risked. (Trade Navigator has a replay feature which allows you to progress the chart one day at time. It's as close to live trading as you can get...as long as you are honest with yourself and only trade what is in front of you and don't go back and change your trades once you see how the trade progressed).

Each market took about a week to work through the entire 2016 calendar year. My results were amazing and after reviewing the spreadsheets with John I pronounced myself ready to move to real money. As I made the transition I realized that even though I had cemented the rules I wasn't ready from a mental standpoint. When I was paper trading, it only took a few minutes to get the bad taste of a loss out of my mouth. Obviously, that isn't the case when live trading! I am very conservative by nature and was trying to avoid any type of draw down to my account. Any draw down just wrecked my confidence. Even though I had proven to myself the type of returns that are possible trading time, I was just too fearful of making a mistake to just follow the rules.

All the while, John continued to work with me. It was very comforting to know I could reach out to John at any time if I had questions. Bottom line...John wasn't going to let me fail. He continued to have 1 on 1's with me until I finally gained the experience and confidence I needed to be successful. John also devised a way to hold me accountable. Since early October I have recorded my live trading on a spreadsheet and sent the spreadsheet to John for review. This has forced me to strictly adhere to the rules John teaches or he'll kick my butt. Funny thing happened once I got my emotions out of the way and just followed the rules...my trading became nearly as good as it was with my paper trading!

None of this would have been possible if not for John continuing to work with me. He is so generous with his time. Once I completed my tutorial I assumed that would be the end of my access to John. Not so. He continues to be personally interested in my success and I can set up a meeting with him at any time. Tell me where else you can get that!

The Danielcode has changed my life. I highly recommend the video tutorial. I can't tell you many times I've gone back and watched the recorded sessions. Do yourself a favor and signup for a tutorial. The Danielcode is for real and John Needham is a treasure in my book. ML USA

And this from one of my favourite ladies:

After 'discovering' the DC website, I found myself eagerly awaiting the fortnightly webinars hosted by John Needham. I hoped that somehow I could learn enough from watching and listening to become an effective trader, .but somehow I could not put it all together.

I was reluctant to put myself in a position where I felt foolish not knowing much about futures trading. This is a story of procrastination. Instead of making a clear decision based on what I saw during the many webinars and by reading the articles posted on the DC website, I stumbled along until finally I accepted the challenge and signed up for the online DC Tutorial.

I knew that it would be a confronting experience as I know little about the markets or trading...but JCN is an amazing teacher and has seemingly unlimited patience combined with a keenness and eagerness and a real passion to share the DC. JCN 's enthusiasm is infectious..his knowledge base remarkable and his willingness to share this knowledge is a truly amazing gift.

The DC takes the 'guess work' out of trading. Instead of feeling baffled and bewildered the DC offers a proven guidance system to follow with precision tools to navigate the terrain .

It is all too easy to dismiss the DC as being wildly implausible, to be doubtful or dubious and even consider the claims to be far-fetched or unbelievable, but such is not the case. Amazing, fantastic, remarkable, impressive and extraordinary not to mention phenomenal are the words I now use to describe the DC.

Doing the DC online Tutorial is without a doubt the most exciting and exhilarating thing that I have done in quite some time. Every day I am constantly amazed at the precision, the perfection and wonderment of it all. Thank you. MB Qld

John Needham is an Australian Attorney who has written extensively on financial markets, Gold, Equities, Forex, Commodities and trading strategies for Financial Sense, Traders Journal and Forex Journal. See the Danielcode website for published articles.

I am looking forward to meeting you.
